

# End of Summer Island-Wide Nature Scavenger Hunt!

Thanks for joining us for the scavenger hunt!

The plants, critters, and other special items can be found all around the island. To participate, go around and take photos (don't take or disturb anything!) of each of these things.

- **Great Egret** Look for this large white wading bird on the edges of fresh and salt ponds around the island
- **Rosa rugosa flower** A large bright pink flower found in the dunes and near the beach
- **Elderberry** A shrub that's producing drooping dark purple-to-black berries right now
- **A shorebird** Shorebird migration is underway! Look for various species of plovers, sanderlings, and sandpipers
- **Surf clam shell** A large triangular-shaped shell with a rounded top edge
- **A dragonfly** Many species of dragonfly can be seen flying over open fields and ponds

If you get them all (or are an all-star hunter!) you'll get a **super cool patch or sticker** in the mail.
